FA Respect Barrier Set Up Instructions

Touchline Logos Limited

Tel: 0845 325 7190

Web: touchlinelogos.com

(1) Set 2-3m from the touchline

(2) Open the post legs approx 500mm wide & Push in to the ground (at 90 deg to the line) up to the red markers

(3) Peg down the cord at one end

(4) Wrap the cord around the posts, (and peg down after the last post)

FA Respect Barrier Set Up Instructions

Tel: 0845 325 7190 Web: touchlinelogos.com

Note: Place the posts at 90 deg to the touchline (sideways on) Do not thread the cord through the loop. Peg down the Cord & Wrap it around the Post.

1

(1) Starting at the half way line open out one post approx 500mm and push it in to the ground (until you reach the **RED** depth marker) at **90** degrees to the touchline and a safe distance of 2-3m back from the touchline.

2

(2) This will leave an even amount of posts per half , So place the next posts an equal distance from each other (between 10 & 12m) until one half is complete. Return to the half way line and repeat the opposite way until all posts are in position.

3

(3) Undo the locking latch on the side of the reel and starting at one end **Peg Down** the cord through the loop using one steel peg about 3m away from the post, and parallel with the touchline and first post, then walk **with the reel** to the first post.

4

(4) Once pegged down take the reel to the posts and WRAP the cord 2-3 times around the top of the Logopost, until you reach the last post. **DO NOT THREAD THE CORD THROUGH THE POST**

5

(5) Tie a loop in the cord on the reel when you've gone about 3m past the last post. Leave the loop tied as this can be used the next time you install your barrier, and will simply wind back on to the reel

6

(6) Peg down at the last post, using the other steel peg about 3m away from the post using the loop above, and keep the cord parallel with the touchline. When pegged down leave the reel about 1-2m away from the barrier and away from the touchline (**Tip: When pegged down simply re-wrap the cord around each post for a good taught line**)

7

(7) To take down, take out the peg nearest the reel and walk up to the first post, winding as you go. Take out the post and walk up to the next post again winding as you go. This will keep the cord taught on the reel. **Do not take out the posts until you reach them with the reel.**

8

Note: If put away when wet simply leave everything in the bag and store in a dry place, the mesh on the bag will allow for drying. If your fabric add a flag requires cleaning simply slide off the flag from the post and machine wash (40°C) refit when dry.
